

# Home Electrical Safety

## Always Look Up Always

Before starting **any** project, **be alert of where the power lines are located**, and know how high they are hanging. Whether you're working on the roof, trimming trees, or painting your siding, it's your job to be aware and to **alert others about nearby power lines**.

1. Locate **all** overhead power lines.

2. Stay at least **10 feet** away from all overhead power lines.

3. **Do not touch** anything in contact with power line.

4. Carry ladders and equipment **horizontally**.

5. Stay at least **35 feet** away from downed power lines and call 911.
