Upon signing this agreement, customer acknowledges the following:

Rebate offer(s) may be changed or discontinued at any time by Skamania PUD (PUD). The PUD disclaims any warranty, whether expressed or implied, regarding the energy efficient upgrade(s) listed on this application for any materials or labor associated with installation, maintenance, repair, or any energy savings associated with use.

I understand that the energy efficient upgrade(s) must be installed to the PUD specifications, and certify that I, or my contractor, have reviewed the specifications prior to beginning work. When selecting a contractor, I understand that it is the business owner's responsibility to request proof of insurance and licensing that meets the statutes and rules of the Washington State Construction Contractors Board. The PUD strongly recommends validating qualifications before work begins.

I understand the above and certify that I am a customer of the PUD, that the energy efficient upgrade(s) are installed at the address indicated and that this address is within the PUD service territory.

CUSTOMER SIGNATURE _____ **DATE** _____

By Signing this form, I confirm that the above information is correct to the best of my knowledge.

**Rebate(s) will not exceed 70% of total installed cost.
To ensure availability of funds project must be pre-approved.**

Mail completed rebate application, final invoice and final AHRI for project to:

Skamania PUD
Attn: Energy Efficiency Rebates
5625 NE Elam Young Parkway #100
Hillsboro, OR 97124
FAX: 1-503-344-6942
rebates@esgroupllc.com

The connected thermostat verification rebate may be claimed in the same year as the initial connected thermostat install but the verification must be at least three months after the initial connected thermostat installation. The application is due within six months of verification of the install.

Allow 8 to 10 weeks for rebate processing, after the receipt of the final invoice and paperwork.

Call 1-888-883-9879 to learn about additional energy efficiency programs.

Participation in this energy efficiency program allows Skamania PUD to use your electrical energy consumption history for energy savings research. Your consumption history may be shared anonymously with Bonneville Power Administration for energy savings verification and research.

NON-RESIDENTIAL CONNECTED THERMOSTAT VERIFICATION REBATE PROGRAM

Steps to Participation

1. GETTING STARTED:

- Contact Skamania PUD Efficiency Services (rebates@esgroupllc.com) for the thermostat programming verification.
- Incentives are only available for retrofits. New construction projects are not eligible.
- The thermostat received a payment for the initial install and was installed after Oct. 1, 2019.
- A verification payment can be claimed in the same year as the initial install, provided verification takes place at least three months after the initial install.
- The thermostat is eligible for up to four verification payments within two years of the initial install.
- The thermostat is programmed to meet the initial install programming requirements.
- The thermostat is eligible for a verification payment twice within one calendar year. Verification may not be less than three months apart.
- Verification must occur in different seasons (e.g., one in summer and one in winter, or one in fall and one in spring).
- Verification is not required to be conducted at regular intervals. The thermostat is eligible for a verification payment even if there has been a gap in verification activities.
- There is no restriction on who can complete verification.
- Connected Thermostat initial installation rebate is \$150.00 per connected thermostat (see form) & connected thermostat verification is \$50.00 per connected thermostat.

2. PRE-INSTALLATION CONDITIONS

- Thermostat is connected to the internet.
- Temperature setback is used for unoccupied hours (heating and/or cooling, as applicable).
- Fan schedule uses auto mode for unoccupied hours (e.g. during unoccupied hours, holidays, or the fan will only run when there is a demand for heating or cooling).
- For heat pumps, auxiliary resistance heat lock-out is enabled with appropriate temperature set point.
- Override duration set to three hours or less.
- Simultaneous heating and cooling are eliminated in cases where two or more systems serve spaces not separated by physical barriers (ie., "invisible zones").

3. PROJECT PRE-APPROVAL

- Skamania PUD Efficiency Services sends the pre-approval to the contractor after the above information has been verified.

4. DOCUMENTS REQUIRED TO PROCESS YOUR REBATE(S)!

- The contractor final invoice(s) including service date & installed cost.
- The attached Connected Thermostat Verification application with the verifier's signature.

Documents can be mailed to the address on the rebate application, faxed to 1-503-344-6942 or emailed to rebates@esgroupllc.com.

5. RECEIVE YOUR REBATE

You can expect to receive your rebate 8 to 10 weeks after the receipt of all required documentation.
The rebate(s) will not exceed 70% of the total installed cost

All work must meet Bonneville Power Administration (BPA) and Skamania PUD program and installation requirements.

For additional questions, call 1-888-883-9879.

Connected Thermostats Qualified Products List

Applicable to: BPA Commercial Connected Thermostat Retrofits
 Effective: October 1, 2019 to September 30, 2021
 Product list last updated: October 1, 2019

The product list is periodically updated to reflect newly qualified models. For more information, or to request that products be added to the list, please visit BPA's Trade Ally Network NW website at tradeallynetworknw.com. All product additions are reviewed and accepted by Bonneville Power Administration prior to publication on the product list.

Manufacturer	Model
Carrier	33CONNECTSTAT
Ecobee	EMS Si 3 Lite 4
Honeywell	Vision Pro 8000: TH8320R1003 with Redlink Gateway Vision Pro 8000: TH8321WF1001 WiFi 9000 Prestige IAQ
Pelican Wireless Systems	TS200 with Gateway TS200H with Gateway TS250 with Gateway TS250H with Gateway
Profile Systems	P1900
Proliphix	IMT550c/w
Trane	Pivot Smart Thermostat (BAYSAT814 or TCONT830AS52DAA)
Venstar	T4900SCH with Wi-Fi module (ACC-VWF1) and Skyport app T8850 Colortouch T8900 Colortouch Explorer T4800 with Wi-Fi module (ACC-VWF1) and Skyport app Explorer T4900 with Wi-Fi module (ACC-VWF1) and Skyport app Explorer mini T2050

A built-up building automation system may include features or functionality similar to a connected thermostat, and examples of these types of products are listed below for reference. While these products are not eligible for a connected thermostat incentive, they may be eligible for custom incentives.

Built-Up System Manufacturer	Built-Up System Model
Daikin	BRC1E73 when paired with intelligent Touch Manager (iTM)
Honeywell	LCBS Connect System with TS120 Wall Module, CVAHU Controller (PN: YCRL6438SR1000) and LCBS Connect Gateway (PN:LGW1000)
Johnson Controls	TEC3030-00-000
Makad Energy	Robert Shaw 9801i2 thermostat connected to a Dreamwatts platform
MAMAC	Maverick Thermostat IP-MT-101 Maverick Thermostat IP-MT-201 Maverick Thermostat IP-MT-151
Siemens	RDY2000BN when paired with an Apogee BAS
Transformative Wave	CATALYST
Unity Energy Services Group	T-32P thermostat connected to a UNITY Energy Management System

Connected Thermostats Qualified Products List

Applicable to: BPA Commercial Connected Thermostat Retrofits
Effective: October 1, 2019 to September 30, 2021
Product list last updated: October 1, 2019

Connected thermostats save energy by controlling HVAC usage in single-zone HVAC systems. These thermostats connect to the internet and have features that include online alerts, monitoring and programming and/or control. Energy savings are associated with reduced heating and scheduled temperature setbacks and setting the fan to auto mode during unoccupied hours.

Although the thermostat capabilities are an important part of realizing energy savings, correct programming and subsequent verification of these features help ensure persistence of energy savings.

While a connected thermostat product may include additional features, qualified connected thermostat products are defined as meeting all of the following specifications:

- Capable of being connected to the web
- Support multiple temperature setback schedules
- Support fan-mode scheduling (continuous on vs. auto-mode)
- Support limited duration overrides (i.e. reverts to programming after 24 hours)
- Automatically restore programmed settings after power outage
- Supports multiple cooling stages

Products that do not qualify for a connected thermostat incentive may still be considered for incentives under the custom analysis path.
